SUMMARY

Shopify developer with 4+ years of commercial experience. At Informatica I built and maintain a complex custom Gadget-based admin app (11 extensions) and a fully custom Liquid theme. In parallel, for the past year I have been working at a Shopify agency building and supporting client stores — from-scratch builds to long-term retainers — with custom apps, Shopify Functions, and AI-powered storefront tools. Experienced with platform migrations and full-store rebuilds — from WordPress and legacy systems to Shopify. Comfortable leading complex custom development projects end-to-end.

EXPERIENCE

Remote Shopify Development Agency (name under NDA)

July 2025 – Present · part-time retainer · remote

Shopify Developer

- Build and customize Liquid themes for client stores using Online Store 2.0 (sections, blocks, schema)
- Develop custom Shopify apps with Remix / React Router, Polaris, and App Bridge
- Published a public Shopify app using Shopify Functions for automated, rule-based discount logic
- Building an AI storefront chat agent (near production launch) with storefront theme extension — product discovery, cart management, order lookup (React Router, MCP protocol, Claude API, SSE streaming, Prisma/SQLite)
- Built an AI blog generator Shopify app (React Router, OpenAI API)
- Built Checkout UI Extensions for payment/delivery filtering and order status customization
- Third-party app setup and integrations across multiple merchant stores

Informatica

2022 – Present · remote

Shopify Developer informatica.com.ua

- Architected and maintain a complex custom Shopify app with 11 Admin UI Extensions — order management, Nova Poshta logistics, SMS notifications, print center, multi-supplier inventory sync, OpenAI recommendations, Google Sheets reporting, and PDF generation — supporting ~100 daily orders (Gadget.dev, TypeScript, Polaris)
- Developed and maintain a fully custom Dawn-based Liquid theme (templates, sections, storefront logic)
- Multi-supplier inventory management integrating Nova Poshta, Rozetka, and external supplier APIs — handling logistics and fulfillment data flows comparable to ERP integration patterns; Shopify Flow automation
- Marketing analytics setup (GA4, GTM, Google Ads)
- Improved Core Web Vitals scores and page load performance through script optimization and lazy loading

SoftRyzen

Sept 2023 & Jan–Feb 2024 · remote

Frontend Developer

Team development of commercial websites; team lead on one project. Stack: Next.js, TypeScript, Strapi, Sanity.

PROJECTS

Suite Admin App informatica.com.ua

11 Admin UI Extensions: multi-supplier inventory, Nova Poshta, OpenAI recommendations, Google Sheets/PDF reporting.

[Gadget.dev](#) · [TypeScript](#) · [Polaris](#) · [App Bridge](#)

AI Storefront Chat Agent

Near-production app with storefront theme extension. Product search, cart/checkout, order tracking via SSE + MCP.

[React Router](#) · [Claude API](#) · [MCP](#) · [Prisma/SQLite](#)

Dynamic Discounts [public app](#)

Automated product discounts via Shopify Functions, rules embedded in product titles.

[Remix](#) · [Polaris](#) · [App Bridge](#) · [Shopify Functions](#)

Shopify Custom Theme [live](#)

Custom Dawn-based theme with full Liquid templates, sections, and storefront features.

[Liquid](#) · [JavaScript](#) · [CSS](#)
